

HSI Technical Committee - Spring 2019

- IEEE Systems Conference (SYSCON)
 - A Success! Our Sociotechnical Track was standing room only.
 - Also, attached is the plenary talk from the conference given by Dinesh Verma - note the multiple focus on human centered concepts.

- HSI TC Meeting at SYSCON
 - Also a Success! About ten colleagues attended the meeting and discussed ways to make the HSI TC more prominent as part of the IEEE Systems Council.
 - New focus topics for next year's conference include Human-Machine Teaming and Engineering Augmented Intelligence Systems.

- Human Factors & Ergonomics Society policy on Human System Integration
 - Attached is a policy statement from HFES on HSI.
 - Their goal is to require all DoD and other Federal departments to apply HSI processes and standards in all system acquisition programs

- Workshop Track at INCOSE HSI Conference
 - Christian Schnedler is looking for panel members for “Human Interface Considerations for Domain Awareness” - please contact him directly at christian.schnedler@gmail.com
